Message from the Chair of the Board

Dear Friends of The South Suburban Council:

This is my first annual letter as The Council's Board Chairperson, and I want to begin by expressing what an honor it is to be apart of this organization and community. I have had the opportunity to engage and share experiences with The Council's Board of Directors, Executive Leadership Team, staff, and even the wife of a past client. I have come to the understanding that The Council has been and will continue to be a path to freedom from addiction for the community we engage and serve. What I find remarkable is the story of a past client, who over 34 years ago received services to recover from alcoholism. This past client has lived a very successful life to date. He was able to raise his four children along with his wife. They started a very successful business and is now the Chairman of the Board of Directors of a local church in his community and has been alcohol free because of the existence of the Council and the impact it has had in his life. These are the types of stories we want to continue to create for our clients.

As we continue this journey, I want to share my deep gratitude to Myron Graham's dedicated service, first as a board member, then board chair and now it's new CEO. He has shown his passion about The Council through the facilitation of an exciting and wonderful transformation of this organization's facility, staff's development and the client programs and services. I also would like to share my gratitude for Myron's partnership and collaboration with his Executive Leadership Team and the Board of Directors in creating a path forward to greatly expand our impact.

This year was one of change, new beginnings, and growth for The Council – in addition to Myron becoming our new CEO, we welcomed new members to his Executive Leadership Team, as well as new Board Members, who brought fresh perspectives and years of robust experiences from some of the most well-known foundations, local health care organizations, community-based organizations, and Managed Care Organizations in Illinois. The Board of Directors has reorganized into the following committees: Finance, Clinical, Quality & Compliance, Health Information Management & Data Analytics, Marketing/ Public Relations/Fundraising, Environment of Care, Personnel and Strategic Planning. Each created charters to give guidance to members which aided in the alignment with and support of The Council's Executive Leadership Team. Each subcommittee's purpose is to routinely meet throughout the year to provide mentoring and training to the Executive Leadership Team. We also provided a new perspective for the Board's Executive Committee and the Nominating and Board Development committee. These committees are dedicated to develop, support and manage the Board of Directors through the guidance of their charters.

We dedicated ourselves to thinking boldly in the service of our clients and community. As we set out determined to live and breathe our mission and vision, we have and will, safely and wisely, take on the challenges related to the pandemic to provide needed service requests from the local court & school systems, managed care organizations, State programs such as the Division of Alcoholism and Substance Abuse, and gambling addiction. In addition, we have addressed the needs of local community-based organizations in the south suburbs and Northwest Indiana.

To continue this work, we set a foundation in 2021 to greatly impact the next 5 years, as the Board of Directors presented The Council's Executive Leadership Team with the following 6 goals or areas of focus:

- 1) **Quality Improvement** to hardwire concepts and practices of quality improvement into all aspects of the organization.
- 2) **Workforce Development** to build and retain an engaged workforce.
- 3) **Resource Diversity** to strengthen and maximize our financial health to ensure financial sustainability.
- 4) **Care of the Whole Person** to bring a greater awareness of the programs that we provide to the communities that we serve.
- 5) **Community Engagement** to become the organization of choice in the communities that we serve for addiction and recovery needs.
- 6) **Sustainability** to expand our impact in underserved communities.

These goals were well received by the CEO and his Executive Leadership Team as they joined the Board of Director's in a 3-day retreat to build in the required details for success. The execution of these goals will enable us to continue to reach the financially underserved and those marginalized because of their addictions. We know this will take bold, creative thinking. It will mean taking some managed risks during this COVID 19 Pandemic period that we as a community have been forced into. But, if we do not go where no man has gone in over 100 years, we will not learn what is most impactful in our new normal. We can't wait to partner will you in this work in fiscal year 2022 and beyond. It will be an inspiring journey for us to take together.

With gratitude,

Joyce W. Butler

Chair, Board of Directors

The South Suburban Council

Mission

Our mission is to deliver a continuum of treatment and recovery support services to residents of the greater Chicago Southland, Northwest Indiana and surrounding communities.

The South Suburban Council

History

The Council was given life by a group of people seeking to help others. Its origin dates back to 1967, when a group of concerned individuals, some of whom were recovering alcoholics, and a social worker had the desire to sustain their sobriety and share their inspiration and recovery with others struggling with alcoholism. Among these visionaries was Herb Perkins, a retired long-time employee and counselor of The Council. Their persistence would eventually result in the establishment of the area's first alcoholism treatment center.

In the early 1970s, The Council experienced the first of many opportunities for growth when the Illinois Department of Mental Health granted the Agency its first grant-in-aid contract. By 1973, the State's funding broadened The Council's information and referral service through a grant-in-aid contract for outpatient counseling. One year prior, the Agency had relocated to Chicago Heights and Joliet.

By October of 1981, The Council was providing 20 residential treatment beds and 12 detoxification treatment beds. Residential services were provided to women as well as men. Its various programs were spread among Park Forest, Homewood, and Robbins.

Since early 1980s, The Council has grown to be a major addiction provider in Chicago Southland area, with 64 residential treatment beds offering withdrawal management, crisis stabilization treatment, co-occurring disorder treatment and ASAM level 3.5 addiction treatment. The Council continues to be governed by community leaders with a passion for the betterment of the South Suburbs and The Council stands true to its mission since its inception.

In line with its long tradition of being an adaptive agency that listens and learns from its communities needs, The Council has been providing a comprehensive co-occurring disorder services for patients with a co-occurring mental health and addiction disorders. The Council has also added Medication Assisted Treatment (MAT) services to its array of services to support the emerging trends in Trauma-Informed care. In 2018, The Council become a licensed Community Mental Health Center (CMHC).

To support the patients sustain and stay on the path to recovery, The Council expanded its recovery support services by adding a Recovery Coach program in 2018, with a primary goal of reducing recidivism.

The South Suburban Council Commitment

A COMMITMENT TO QUALITY is a culture issue for South Suburban Council patients, staff and Board. The leadership team must set high standards for quality and constantly work to maintain the standards so that employees, patients and community stakeholders know that it is part of our culture and important at every level of service.

A COMMITMENT TO PATIENT centered care requires that we embody a patient first philosophy. In doing so, staff must commit to actively seeking out and listening to insights from the patient community to inform decision-making throughout the treatment process. Next, make sure services are high quality, convenient and accessible. Use data to make informed decisions about all programs and services. Lastly, be intentional about everything we do.

A COMMITMENT TO STAFF means promoting a spirit of gratefulness/thankfulness within the work environment. The SSC Council and its Board are committed to being an equal opportunity, affirmative action organization in accordance with civil rights legislation and do not discriminate on the basis of race, religion, national origin or ancestry, gender, age, sexual orientation, ability or other factors prohibited by law. We seek to provide an environment of respect for employees which promotes professional growth; encourages achievement of individual potential; rewards individual creativity; cultivates responsibility and nurtures growth.

The leadership team recognizes our responsibility to employees which includes open and honest communication, stated expectations, fair and timely assessment of performance and equitable compensation within a framework of equal opportunity.

Year in Review: FY 2021

Key Strategic Successes

Creation of 16-bed Residential Crisis Stabilization and Co-occurring Disorder Program

Reorganized the Mental Health Residential Crisis Stabilization (RCS) program to our existing 16-bed North building to provide a continuity of care with co-occurring disorder as a focus, once the patient is stabilized.

All Clinical programs were re-Certified by Joint Commission

The Council underwent an audit by Joint Commission to re-certify our Clinical programs. The Council was successfully re-certified with no major findings.

Received A New Service Contract For Addiction and Mental Health Services

The Council was awarded a new service contract from United States Parole Office to provide addiction and mental health services to parolees.

Provided housing for Homeless and Patients with no safe housing during COVID-19 Pandemic

The Council housed many patients during March thru June, regardless of the reimbursement status of the patients' stay and the services received.

Became a Gambling Addiction Treatment Provider

The Council was licensed by Substance Use Prevention And Recovery (SUPR) to provide Gambling Addiction Disorder Treatment in April 2020. The Council will cover Cook, Will, DuPage, Grundy and Kankakee counties. The Council will be offering much needed educational and treatment services to support those with this impulse-control disorder.

Youth Outreach Services

Under the direction and guidance of the Board, The Council initiated a strategy to expand Youth Outreach Services by providing weekly educational groups in eight schools in Chicago Southland area. The Council is committed to expanding its educational program to more school districts and also planning to expand its treatment services for Youths in upcoming years.

Medication Assisted Treatment (MAT) For Residential Patients

The Council was successfully able to support, in-house, 50 residential patients with MAT services — Suboxone and Vivitrol.

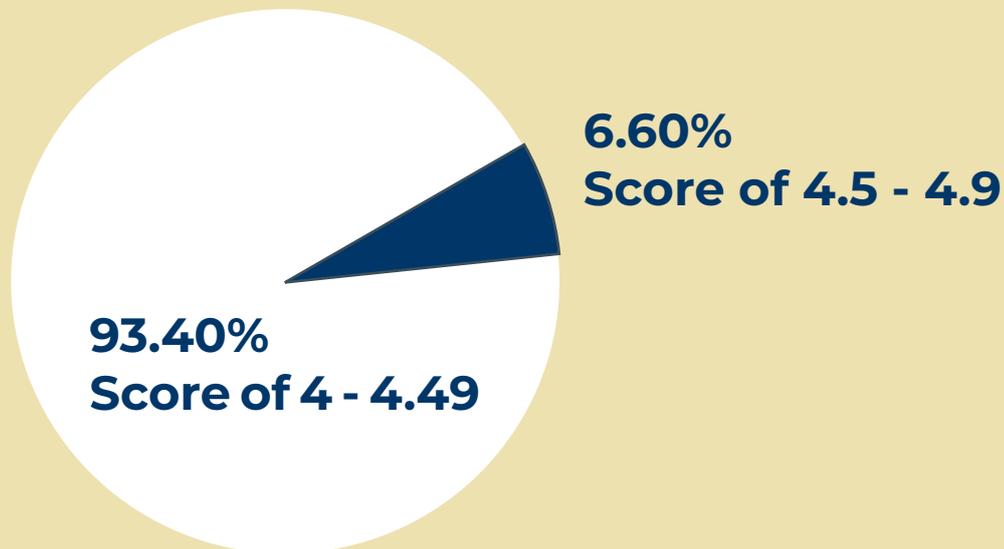

Demonstrated Fiscal Solvency Amid COVID-19 Pandemic

Our current, unaudited projected annual financial statements show a break-even financial status, thanks to many grants from stakeholders and PPP loan acquired during the pandemic and the services received.

Year in Review: FY 2021

Patient Satisfaction Score

5 - Highest | 1 - Lowest

The Council's key measure to demonstrate the success of its services is Patient Satisfaction Survey Score.

This measure is computed based on variety of questions targeted towards welcoming environment, quality and quantity of service, social and recovery support services during treatment and post-discharge, and financial support services.

A score of 4 or more shows the commitment, passion and the skill-level of our staff in providing quality and compassionate care to our patients.

Year in Review: FY 2021

Population Served

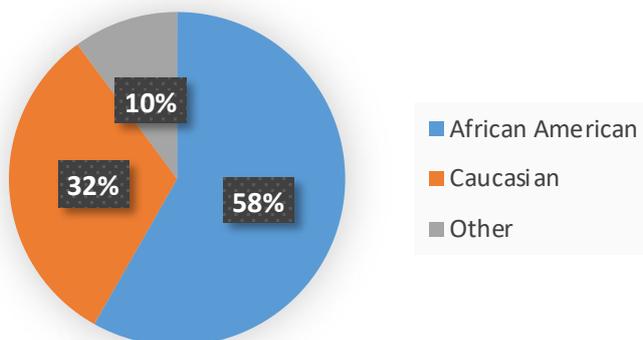

1,112 Patients served in FY 2021

The COVID-19 pandemic continued to pose a challenge to The Council throughout FY21 through reduced census numbers and staffing shortages. The Council rose to the challenge by continually assessing and adapting strategies to continue to fulfill our mission to serve our community. The Council's adaptation to tele-health services allowed The Council to continue to provide treatment to those in need. Despite the pandemic and staffing challenges, the Council maintained its resolve and moved forward with the opening of our Recovery Home in December 2020.

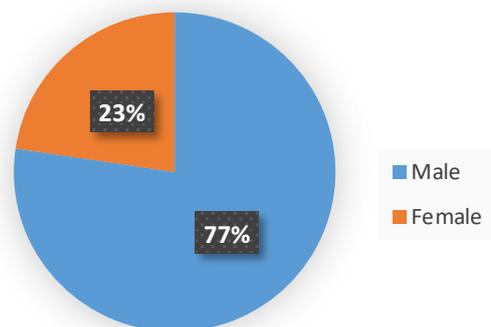

The Recovery Home provided an opportunity to patients that would have otherwise found themselves homeless after discharge. The Recovery Home has allowed individuals to be in secure housing while still continuing their recovery through engagement in outpatient services.

The Council continued to assess and adapt our COVID-19 protocols throughout FY21 in an effort to provide the safest environment possible for our patients and staff alike. The Council continues to maintain a 100% masking policy to ensure safety and provides weekly testing to our patients as well as an opportunity for patients to receive a vaccination from a community partner.

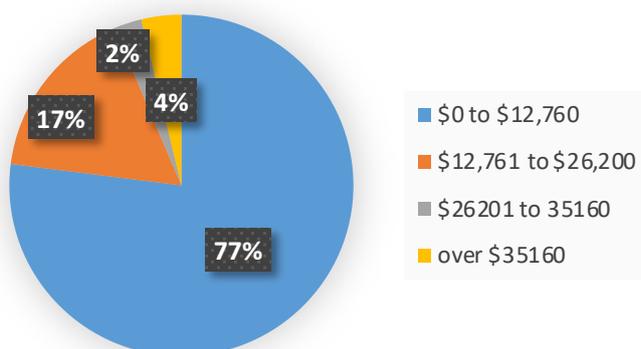

Race

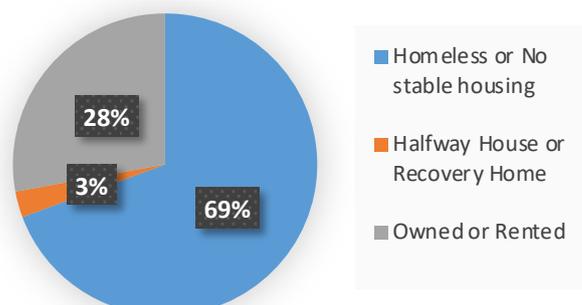

Gender

Income

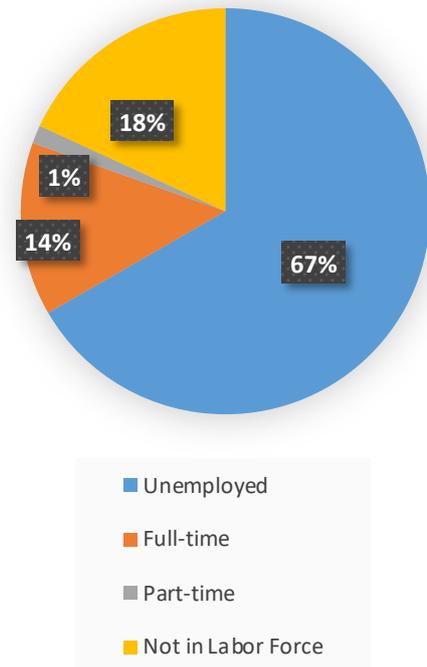

Living Status Type

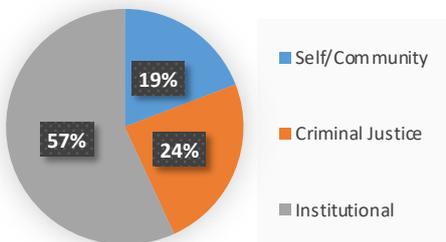

Unemployment among patients served by The Council continues to be a major concern. The Council is working to help address this concern through our Recovery Home model. The Recovery Home model is intended to address barriers for our patients such as balancing continued treatment, developing skills, finding employment and having the ability to pay rent.

Recovery Home residents have an opportunity to obtain employment and skills through a local employment agency and local volunteering opportunities all while having the security of stable housing.

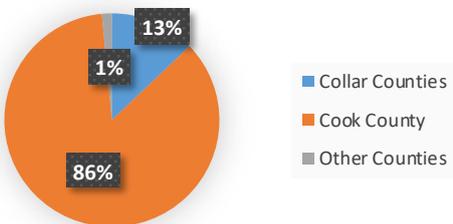

Employment Status

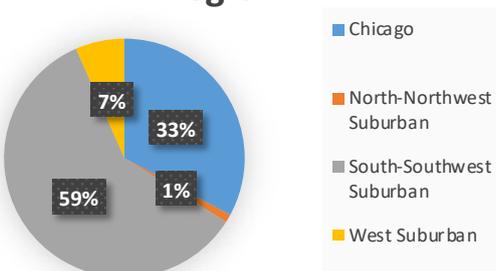

Referral Source

County Distribution

Region

A majority of the patients served by The Council reside in Cook County. However, The Council offers unique services that are beneficial to residents of collar counties and highly sought after by more than 200 patients who do not reside in Cook County. Within Cook County, majority of The Council's patients reside in South Suburbs.

However, nearly 350 patients served by The Council reside in Chicago area. The Council has a very balanced referral sources including Hospitals, Criminal Justice system, other treatment providers and self/community referrals.

These data demonstrate The Council's success in meeting its mission to support patients from Chicago Southland area and its surrounding communities and in supporting various stakeholders who are keen on improving the wellness of the residents our communities.

Clinical Services & Data

Clinical Program Highlights

Admissions

Our admissions team completed 1,346 assessments in FY21 despite the continued COVID-19 pandemic. Our admissions team helped The Council to continue our mission of being a community resource by adapting to completing assessments via tele-health and helping in other departments short-staffed due to COVID-19.

Recovery Home - 24 Beds

The Recovery Home began housing residents on December 7, 2020 with its first 2 clients. Recovery Home began in December with a capacity of 8 beds and grew to 24 available beds by the end of the fiscal year due to demand. Residents of the recovery home engage in employment, peer groups, 12 step groups, outpatient groups, and therapy services as they work towards sustained recovery in the community.

Residential - 48 Beds

During COVID-19 pandemic in FY21, this program continued to serve patients and provide treatment despite The Council's own struggle with COVID-19 outbreaks and staff shortages. The Residential team provided service to patients that would have had no where else to go during the state's periods of being shut down.

Residential 16-bed Crisis Stabilization and Co-occurring Disorder Program

This crisis stabilization program was started in June 2012 as a response to closing of the Tinley Park Mental Health facility. The patients admitted to this program have co-occurring mental health and addiction disorders. In FY21, this program provided an opportunity to 296 individuals in crisis, with co-occurring disorders, to stabilize and receive treatment.

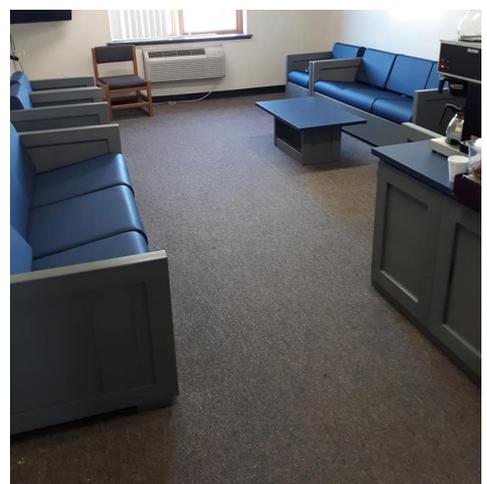

Outpatient Program

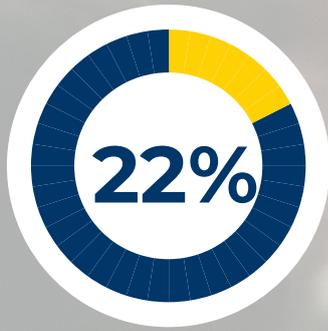

This program offers various services:

- **Intensive Outpatient Services**
- **Basic Outpatient Services**
- **DUI Services**
- **Early Intervention Services**
- **Co-occurring Disorder Services**
- **Mental Health Services**

The Outpatient Program continued to provide service through a fully tele-health model and continued to provide an almost full scope of services to our clients.

While our admissions numbers were reduced due to the COVID-19 pandemic, the Outpatient team continued The Council's mission.

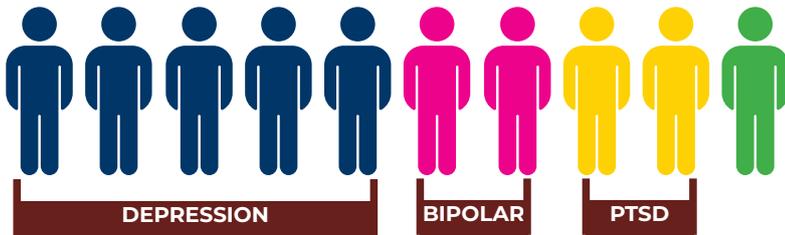

Approximately 22% of our patients we co-occurring disorder patients in FY2021

Top 4 Primary Addiction Disorders Diagnosed

- 41.66% - Alcohol Use Disorder
- 17.64% - Opioid Use Disorder
- 17.19% - Cocaine Use Disorder
- 15.94% - Cannabis Disorder

Top 3 Mental Health Disorder diagnosed, as Primary or Secondary, in our Co-occurring and/or primary Mental Health patients

- 50% - Major Depressive Disorder
- 16.67% - Bipolar Disorder
- 16.67% - PTSD

- 22% - Approx., Patients diagnosed with a co-occurring disorder.**
- 80.87% - Patients diagnosed with more than one addiction disorder.**
- 52.41% - Patients diagnosed with 2 or more addiction disorders.**
- 18.97% - Patients reported as having criminal justice involvement.**
- 6.29% - Patients reported as served in armed forces.**
- 6046- Patients who were admitted to Residential services.**
- 465 - Patients who were admitted to Outpatient services.**

The Council's FY22 strategies is influenced by the numbers represented above.

The Council treats a high number of high and medium intensity patients with almost half the patients receiving Residential services. Typically, the patients being discharged from a Residential service will need to continue their Intensive Outpatient services. However, we find that many of them are unable to complete their Intensive Outpatient treatment due to unstable housing and the inability to pay their rent and complete their treatment at the same time. The Council intends to provide support to those patients through a comprehensive Recovery Home model that handles all of their behavioral health needs in-campus.

The Council is also improving and increasing its trauma informed care by offering more Psychiatric services, MH counseling and Medication Assisted Treatment, via services available in-campus and in some cases, via linkages with FQHCs and other addiction providers within the nearby community. These patients will be supported heavily by our Recovery Coaches to ensure that there is a continuum of care, especially for those patients who were admitted to our Residential Crisis Stabilization program.

Plan for the Future: FY 2022

Strategic Focuses

The Council implemented its strategic vision established in FY21.

The Council will continue to increase its array of services based on feedback from key stakeholders in the communities. The Council will strive to maintain its relationship with its primary funders such as SUPR, HFS, MCOs, United Way of Metro Chicago, United Way of Will County. In addition, The Council will continue to build on establishing new relationships with key stakeholders in the South Suburbs, in order to identify and address the increasing need for addiction and mental health services.

The Council will be implementing new strategies and re-establishing its existing strategies such as implementing quality improvement measures, building our workforce, diversifying our resources, caring for the whole person, increasing community engagement, and addressing long-term sustainability.

Some of the key strategic focuses for FY22 are listed below:

Quality Improvement

COVID-19 has forced agencies across the nation to take a closer look at the implementation of infection control policies and procedures. With an eye towards becoming a center of best practice, the SSCouncil will hardwire established concepts and practices of quality improvement into all aspects of the organization.

Resource Diversity

Strengthening the Council's long term financial health is an important goal. Moving forward, we must position ourselves to better understand managed care and increase Board initiated fundraising.

Community Engagement

In keeping with efforts to become a center for best practice, the Council will need to be seen by our community as the areas best and primary choice for treating SUD and gambling disorders.

Workforce

Developing capacity has been strained by COVID-19 related staffing shortages. Thus, building and retaining an engaged workforce is of paramount importance.

Caring For The Whole Person

As a center for best practice, we strive towards seeking opportunities to address our patients mental, spiritual, physical, cultural and other holistic treatment needs.

Sustainability

The Council will expand our impact in underserved greater Chicago Southland, Northwest Indiana and other surrounding communities.

Community Outreach

Marketing

It is the goal of our Community outreach team to expand and solidify The Council as a destination for those seeking Behavioral and Mental health treatment and recovery support and housing in our new recovery home. The Team has developed and will continue to expand its coordination and referral support efforts with all local court systems. The Council has recently expanded into Will and DuPage Counties with a plan to offer assistance to the court systems in Northwest Indiana in 2020. The referral program driven by the referral coordinator/court liaison, is expanding its outreach to legislators and local court systems.

The Marketing team has written, developed and launched a brand new website and social media platforms that will further the outreach of The Council. The Marketing team has also written, developed and launched an entirely new set of brochures that are located on our website as well. The team has written a 66 page policy and procedure manual for our the new recovery home. These efforts will allow for an easier and a more streamlined recovery process for patients. Patients will be able to access reference resources in one single location from their mobile devices.

Community Development

Our Community Relations team continues to develop relationships with community representatives to ensure awareness of The Council to all residents in the Chicago Southland and Northwest Indiana. The Team has expanded its outreach to more local and statewide agencies to improve our continuum of care approach. This is most notably evidenced by the significant increase in linkage agreements. The Team has been and will continue to spread the word about The Council as evidenced by several recent published articles and news coverage. The Team will focus heavily on future fund raising activities to support The Council financially and expand awareness of The Council to our communities.

New Program Development

The Team has helped launch and market our entirely new gambling treatment program and written the tool kit. The Team has expanded the marketing of our mental health program. The Team has also begun the marketing of our new recovery home. The Team has written over 100 blog/news posts in the last year, written over 50 toolkits and increased our testimonials page. We have strengthened our Google and Yelp rankings - we are now a premier/industry leader. We have taken our IL Helpline referrals from zero to 33,700. The Team has been working diligently to secure a \$1.8 Million dollar capital bill for infrastructure improvements.

Trainings, Community Resource Events, Community Webinars, Town hall Meetings

The team has participated in a numerous amount of trainings that consists of fundraising, gambling, and grant writing to enhance the skills needed to be more successful with bringing awareness and funds to The Council. The team has also participated in several virtual community and town hall meetings to stay connected to the communities we serve, and to continue our networking efforts that help us bring more resources to The Council. The team has also launched our new FREE SCREENINGS PAGE. Visit our social media pages.
