

## CONNECT GROUP

**Definition:** A Connect Group (CG) is a *small, study-driven, personal accountability* group that is usually, though not always, connected to a local campus. These groups are considered places where personal and intimate relationships are built and sustained. They are not considered worshiping communities (public and corporate worship experiences). While there may be time for worshiping together, it is not outward-facing and open to the public in the way a worship-driven community would be. (See Lovewell Community, Crosswalk Campus).
