

SYMBOL EXPLANATION

Throughout the IPHC Children's Curriculum you will notice a variety of teacher's helps represented with various symbols. We've included these "helps" to assist you in engaging, educating, and encouraging the children in your class. Below is an explanation of each symbol you'll come across while using this curriculum.

Helpful Hint: Each time we've included a symbol of a light bulb, we are providing a suggestion on how to make your teaching/lesson presentation go as smoothly as possible.

Teachable Moment: The symbol of a clipboard with a pencil is an icon indicating a "teachable moment." This is a time when you should pause your lesson and provide further explanation to your children. We sneak "teachable moments" into the curriculum strategically to remind the teacher that this content may be more challenging for young learners.

Leader Tip: When you see a symbol of a person teaching, you have encountered a tip that we hope will enhance your leadership in the classroom. Our goal with "Leader Tips" is to make you the best leader you can be!

Classroom Management Suggestion: The teacher and student learning symbol indicates a classroom management strategy tip. Classroom management is often the most difficult part of teaching children, but it can also make all the difference in a successful class! These suggestions offer help in dealing with behavioral issues, class distractions, and creating order from chaos.

We pray these teacher notes will be beneficial to you as you lead, teach, encourage and disciple children!
