

Worship Team

EQUIPMENT

We use In-Ear Monitors (IEMs). To use IEMs you only need two things:

- **A decent set of earbuds**
 - If you would like to use a set from the Church, we are happy to accommodate! Please chat with your worship leader or the sound tech for assistance.
 - If you would like to buy your own earbuds, here are a few we like that are available on Amazon:
 - Shure SE215
 - KZ In-Ear Monitors ZST (these are the more affordable pair)
- **The Yamaha MonitorMix app (available for both iOS and Android)**
 - Please download this app prior to your first rehearsal with us to save some time!
 - At the time of first use, the sound tech or worship leader will help you set up your WIFI settings.
 - YouTube has several good tutorials on this app, should you wish to watch ahead of time! We use In-Ear Monitors (IEMs). To use IEMs, you only need two things:
