

# Building Highlights

## Main Floor

### Lobby Area

We have designed a very open and spacious lobby that can be adjusted for multiple uses including:

- Coffee Bar that can be served from the inside as well as the front patio. The coffee bar also has the potential to include a kitchen space.
- Prayer/Decision room.
- Furniture and fixtures that can be moved to accommodate multiple events.
- Building entry that admits as much light as possible into the lobby.
- Staircase and elevator leading to the second floor

### Kids Area

The kids' area will be fully secured with a great check-in station. It is located right off the Lobby area for easy access and will include:

- Indoor play area with a glass wall visible from the lobby. We designed this so that moms can bring their kids to play during the week and enjoy coffee in the lobby.
- 4 rooms for infants to toddlers. These rooms will be equipped with sinks and everything necessary to provide a safe and fun visit for your children.
- A sensory room designed for kids with special needs who need a space for supervised alone time to decompress.
- Large meeting area where our kids will learn to worship, have Bible study time, play games, and more.
- 2 Smaller meeting areas. This space can be used as a single larger area or divided into two rooms.
- Kids bathrooms that are accessible only from within the kids' area.

## **Conference/Classrooms**

This area is off the lobby and can be used as one open space or 3 individual rooms. We have designed this area for discipleship classes, leader training, funerals, weddings, and other events. This area includes:

- Access to the coffee bar and the future kitchen.
- A roll-up glass door that looks out towards the mountains, making the space suitable for indoor and outdoor use.
- Audio and video needs for events.

## **Worship Center**

The Worship area will seat between 650 and 900 in chairs, depending on the layout. The space can also be filled with tables and chairs making it an ideal location for conferences, Beast Feast, leader development, and much more. This area will include:

- Cry Room located at the back of the worship center, a room where moms can feed, change diapers, and calm their babies. It will have one-way glass into the worship center so mothers can experience the service live.
- The audiovisual will feature an LED wall on the stage, along with a high-quality sound and lighting system.

## **Second Floor**

### **Students Area**

This area will be a place for our Students to hang out, host small groups, play games, and more. We are still in the process of designing this area.

### **Office Space**

We will also have our staff offices on the second floor.

This is just a small overview of what God has been leading our leadership towards as we seek Him about what we are to use this building for. We know this building is not just for Sundays. We see it as a tool that God is giving us through your generosity to reach the Flathead Valley and the ends of the earth with the Gospel. We have more details and

designs to complete, and we will be creating Work Groups to help with them. **If you have questions or comments, please email us at [building@venerationchurch.com](mailto:building@venerationchurch.com)**
