

Suggestions for Personal Learning Questions

If you already have a question on your mind that you'd like to look at in the Bible, use that for your personal learning question. But if you don't, this is a list of common questions and topics that people ask as they study the Bible. Feel free to use one of these as the question you are working on throughout class. If none are questions you have, try to choose one that people in your life might ask. Some of these will more directly be addressed in the class handbook and some will require more outside research and thinking on your part.
